

## Testing

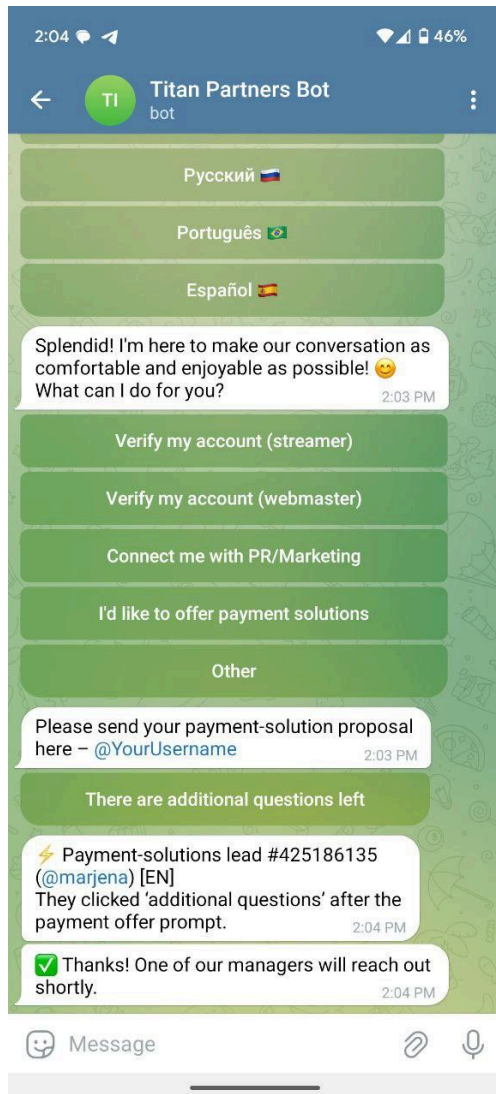

Verify account as streamer. Entered The preferred payment model to be CPM and the market to be Europe. Typed the text answers as well. The manager gets all the answers. Here I entered my account to be the manager, so there is the user message as well as the manager alert in one chat. The same logic applies to the webmaster path:

If a user clicks “Connect me with PR/Marketing”, it gets the message “Please send your commercial offer here – @YourUsername”. Then a user clicks the button “Additional questions left” and gets “✅ Thanks! One of our managers will reach out shortly.’ The manager gets the message “@usurname ... They clicked ‘additional questions’ after the PR offer prompt.” in the chat.

The same logic if a user chooses ‘I’d like to offer payment solutions’:

## Project Description

[bot.py](#) - main execution

[flows.py](#) - wizard handler (step-by-step instructions) and the whole logic

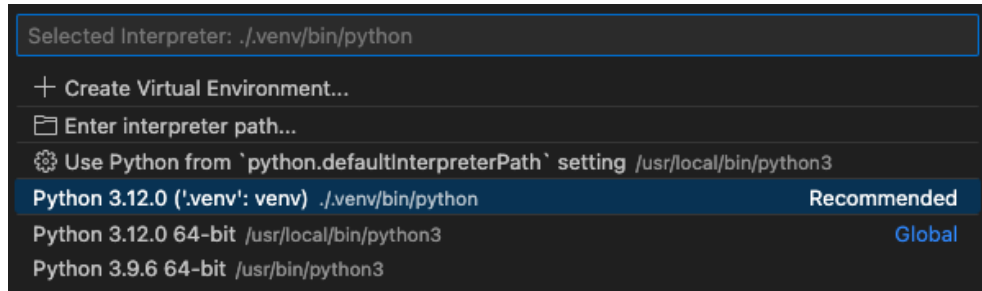

[router.py](#) - routing a message to a manager

### Type to terminal

```
# activate virtual environment
source .venv/bin/activate
```

```
# install deps
pip install -r requirements.txt
```

Select Python interpreter as:

## Execution

Run: `python bot.py` (from the project root with venv) or simply run the script  
Press Ctrl-C (cmd-C) to stop the bot

## Chat ID for a manager

Paste username and chat ID into the [router.py](#) script where the `DEFAULT_MANAGER` is defined. To get chat ID you need to:

1. In Telegram, search `@userinfobot` (or `@getidsbot`).
2. `/start` → it replies Your Telegram ID: 624123456.

Make sure the manager has started a chat with the bot so it can send messages.

## PR/Marketing and Commercial offer for payment solutions contact

Replace `@YourUsername` with your actual PR/Marketing contact handle under the `PR_INSTR` in the [flows.py](#) script
